30TB SERIES: MADE FOR THE BIG FISH. GREAT FOR THE SMALL FRY.

Because they count on you, you rely on the 30TB Series. Don't let your heavy duty customers shop around for their light duty needs: get the carrier that does everything right. Load up heavy machinery and tow a car, all at the same time, if need be. Get the most from every mile you travel.

ADVANTAGES

- **FLEXIBLE:** While its 15-ton capacity deck hauls anything from cars to machinery, the 30TB's super/medium duty tow bar can tow a truck on the way to the call, and a car on the way back.

- **DO MORE!** Lower deck height, strong and lightweight design as well as powerful hydraulic components, make 30TB Series carriers easy to use and outstandingly efficient and dependable. Do more, spend less.

- **TRUCK RECOVERY?** Yes! With their tough and sturdy construction, NRC Carriers make recoveries safer, easier and more cost effective. Use the roller guide and recovery spades to side or straight pull from the end of deck. Now, an essential piece of equipment that's both powerful and affordable.
